Committees and exhibitors ix
Conference photographs x

Section 1. Element and isotopic analysis

Elemental isotopic and structural analysis using ion beams
J.P.F. Sellschop and S.H. Connell 1
Time-of-flight heavy ion backscattering spectrometry
J.A. Knapp, J.C. Banks and B.L. Doyle 20
In-situ hydrogen charging of thin Nb films and depth profiling with the $^{1}H(^{15}N, \alpha\gamma)^{12}C$ nuclear reaction
S. Blässer, J. Steiger and A. Weidinger 24
Quantitative calibration of intense (α, α) elastic scattering resonances for ^{12}C at 5.50–5.80 MeV and for ^{16}O at 7.30–7.65 MeV
J.A. Davies, F.J.D. Almeida, H.K. Haugen, R. Siegele, J.S. Forster and T.E. Jackman 28
Use of the $^{9}Be(\alpha, n)^{12}C$ reaction for detection of beryllium
J.F. Harmon, J.M. Knox and G. Vizkelethy 33
Quantification of beryllium in thin films using proton backscattering
J.A. Leavitt, L.C. McIntyre Jr., R.S. Champlin, J.O. Stoner Jr., Z. Lin, M.D. Ashbaugh, R.P. Cox and J.D. Frank 37
Measurements of thin oxide films of $SiO_2/Si(100)$
W.N. Lennard, G.R. Massoumi, I.V. Mitchell, H.T. Tang, D.F. Mitchell and J.A. Bardwell . . . 42
Cross sections for non-Rutherford backscattering of ^{4}He from five light elements
H.-S. Cheng, H. Shen, F. Yang and J.-y. Tang 47
RBS and ERD analysis using lithium ions
J.R. Liu, Z.S. Zheng, Z.H. Zhang and W.K. Chu 51
Study of annealed amorphous hydrogenated films by elastic recoil detection analysis
F.L. Freire Jr., C.A. Achete, C.F.O. Graeff, I. Chambouleyron and G. Mariotto 55
Application of the ERD method for hydrogen determination in silicon (oxy)nitride thin films prepared by ECR plasma deposition
L. Hrubčín, J. Huran, R. Šandrik, A.P. Kobzev and D.M. Shirokov 60
Optimization of the depth resolution in ERDA of H using ^{12}C ions
E. Szilágyi, F. Pászti, V. Quillet and F. Abel 63
Resonant scattering assisted light element analysis
R.L. Zimmerman, D. Ila and C.C. Smith 68
Simultaneous measurement of the hydrogen isotopes H, D, T and ^{3}He with HIERD
U. Kreissig, R. Grötzschel and R. Behrisch 71

Section 2. PIXE and PIGE

The application of PIXE and PIGE techniques in the analytics of atmospheric aerosols
E. Koltay 75

0168-583X/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

Ion beam analysis for the environment
K.G. Malmqvist 84
High precision determination of ^{16}O in high T_c superconductors by DIGME
I. Vickridge, J. Tallon and M. Presland 95
The measurement of enhanced PIXE yields with $^{3}He^{2+}$ ions
M. Peisach, C.A. Pineda and A.E. Pillay 100
Analysis of brown coal and their liquefaction products
J. Vogt, C. Vogt, D. Lehmann and W. Knolle 104
Thickness measurement of titanium nitride layers on steel using PIXE and proton backscattering
J.L. Campbell, W.J. Teesdale and J.A. Maxwell 108
PIXE gadgets
G. Demortier and Y. Morciaux 112
Thick target yields of deuteron induced gamma-ray emission from light elements
Á.Z. Kiss, I. Biron, T. Calligaro and J. Salomon 118
A study of the ionization of Al, Si, S, Sc, Ti and V by Ar ions in the energy range 1–5 MeV
M. Nekab, A. Pape and Ch. Heitz 123
On the use of LiF as non- and analyte spike for the determination of fluorine by PIGE
C. Olivier and H.L. Van Niekerk 128
L X-ray production cross sections of medium Z elements for 0.4 to 2.0 MeV protons
C.H. Sow, I. Orlic, T. Osipowicz and S.M. Tang 133
A PIXE study of abnormal X-rays from binary fluorides with protons in the range 0.4–2 MeV
R.C.M. Mboweni, C.A. Pineda, M. Peisach and A.E. Pillay 138
The application of high resolution deuteron-induced prompt γ-ray spectrometry to the analysis of some transition elements
M. Peisach, C.A. Pineda and A.E. Pillay 142
Mass calibration and intercalibration of Prague PIXE setup
V. Potoček 145
L-subshell X-ray production by 400–700 keV protons in selected elements with $52 \leq Z \leq 71$
L. Rodríguez-Fernández, J. Miranda and A. Oliver 150
Matrix effects correction in the analysis of Y–Ba–Cu–O bulk samples by PIXE method
R. Šandrik 154

Section 3. Interfaces, multilayers

Interface evolution and epitaxial realignment in polycrystal/single crystal Si structures
F. Priolo, F. Benyaich, S.U. Campisano, E. Rimini, C. Spinella, A. Cacciato, P. Ward and G. Fallico 159
Use of a rastered microbeam to study lateral diffusion of interest to microelectronics
P.J. Ding, R. Talevi, W.A. Lanford, S. Hymes and S.P. Murarka 167
Contribution of IBA techniques to the study of YBaCuO thin films with anomalous c-axis lattice parameter
J.C. Cheang Wong, J. García López, C. Ortega, J. Siejka and L.M. Mercandalli 171
The role of strain in the crystallisation of Ge implanted (100) Si
R.G. Elliman and W.C. Wong 178
Prediction and characterization of compound phase formation at Ge-metal interfaces in thin film structures
T.K. Marais, E. Taylor, M. Ndwandwe, B. Spoelstra and R. Pretorius 183
Consequence of the fractal nature of the collision cascade: end-of-range spikes in ballistic systems
W. Bolse and T. Weber 188
Interdiffusion and thermally induced strain relaxation in $GaAs/In_{0.2}Ga_{0.8}As/GaAs$ single quantum well structures
A. Kozanecki, B.J. Sealy, C. Jeynes, W.P. Gillin and R. Grey 192

Measurements of self-diffusion of Ni and interdiffusion in thin-film amorphous Ni–Zr using RBS
J.P. Krog, J. Bøttiger, N.G. Chechenin and N. Karpe 197

A comparative study of Co–Re superlattices sputtered on glass and Si substrates by grazing angle of incidence RBS, HRTEM, PAC, magnetic and transport properties studies
N.P. Barradas, J.L. Leal, J.C. Soares, M.F. da Silva, P.P. Freitas, M. Rots, S.I. Molina and R. Garcia 202

Section 4. Thin films

Diffusion in thin-film amorphous metallic alloys
J. Bøttiger, N.G. Chechenin, N. Karpe and J.P. Krog 206

Contribution of nuclear microanalysis and of ^{18}O tracer technique to study the oxygen sublattice in High T_c superconducting thin films
J. Siejka 216

Depth profiling of porous silicon surface by means of heavy-ion TOF ERDA
E. Arai, A. Zounek, M. Sekino, K. Takemoto and O. Nittono 226

New trends in hard coatings technology
I.J.R. Baumvol 230

Oxygen isotopic exchange during the annealing of low energy SIMOX layers
Yupu Li, J.A. Kilner, R.J. Chater, A. Nejim, P.L.F. Hemment, C.D. Marsh and G.R. Booker . 236

Preparation of diamond targets for ion beam analysis
M. Rebak, J.P.F. Sellschop and S.H. Connell 243

IBA study of the growth mechanisms of very thin silicon oxide films: the effect of wafer cleaning
F.C. Stedile, I.J.R. Baumvol, J.-J. Ganem, S. Rigo, I. Trimaille, G. Battistig, W.H. Schulte and H.W. Becker 248

Wear measurement of the cutting edge of superhard turning tools using TLA technique
L. Vasváry, F. Ditrói, S. Takács, Z. Szabó, J. Szűcs, J. Kundrák and I. Mahunka 255

Investigation of the mechanism responsible for the corrosion resistance of B implanted copper
P.J. Ding, W. Wang, W.A. Lanford, S. Hymes and S.P. Murarka 260

Investigation of the elements depth profiles in surface layers of glass modified by ion beam assisted deposition
S.M. Duvanov, A.P. Kobzev, A.M. Tolopa and D.M. Shirokov 264

RBS, ERDA and NR analyses of hard amorphous nitrogen-incorporated carbon films
F.L. Freire, Jr., D.F. Franceschini and C.A. Achete 268

Range parameters of ^{13}C implants in semiconductor and metal targets
E. Friedland, M. Hayes, S. Kalbitzer and P. Oberschachtsiek 272

Theoretical study of ion beam modification of carbon foils
S.G. Lebedev 276

A study of ^{2}H migration and release in $^{2}H^{+}$-irradiated $YBa_2Cu_3O_{7-\delta}/LaAlO_3$ ⟨100⟩ samples during rapid thermal annealing
Yupu Li, J.A. Kilner, T.J. Tate, M.J. Lee, F.M. Saba, L.F. Cohen, A.D. Caplin and P.G. Quincey 281

Contribution of IBA techniques to the study of porous silicon films
V. Morazzani, A. Grosman, C. Ortega, S. Rigo and J. Siejka 287

Simultaneous microanalysis of nitrogen and oxygen on silicon using NRA with a cyclotron
E.A. Ivanov, D. Plostinaru, G. Nicolescu and A. Ivan 293

RBS analysis of thin $MoSi_x$ films: Correlation between stoichiometry and some features of sputtering
B. Elstner, A. Schöpke and B. Selle 297

Investigation of hydrogen isotope behaviour in palladium membrane cathodes in the process of water electrolysis by the NERD method
B.G. Skorodumov, I.O. Yatsevich and O.A. Zhukovsky 301

Section 5. Surfaces, structures, dynamics

Sputtering phenomena of $CoSi_2$ under low energy oxygen bombardment
B. Brijs, W. De Coster, H. Bender, J. Alay, P. Osiceanu and W. Vandervorst 306
IBA of Au–Al alloys
G. Demortier, C. Steukers, N. Vandesteene and S. Mathot 311
Annealing of radiation damage in MgO single crystals after krypton implantation
E. Friedland 316
^{15}N Doppler spectroscopy of ^{1}H on diamond
S. Jans, S. Kalbitzer, P. Oberschachtsiek and J.P.F. Sellschop 321
High resolution low energy resonance depth profiling of ^{18}O in near surface isotopic tracing studies
G. Battistig, G. Amsel, I. Trimaille, J.-J. Ganem, S. Rigo, F.C. Stedile and I.J.R. Baumvol 326
Sputtering and transformation of one phase Cu–Ni alloy surfaces under ion bombardment
L.B. Begrambekov, A.M. Zakharov, A.A. Pustobajev, M. Suchańska, S. Kałuża and V. Chodorek 331
Ion-implantation induced anomalous surface amorphization in silicon
T. Lohner, E. Kótai, N.Q. Khánh, Z. Tóth, M. Fried, K. Vedam, N.V. Nguyen, L.J. Hanekamp and A. van Silfhout 335
Stoichiometry effects at Cu–Ni alloy surfaces during 5 keV Ar ion sputtering at room temperatures
V. Miteva, D. Karpuzov, P. Ivanov and St. Angelova 340
Elastic recoil detection analysis of coadsorption of hydrogen and deuterium on clean Si surfaces
K. Oura, M. Naitoh, H. Morioka, M. Watamori and F. Shoji 344
A determination of the critical damage density required for "amorphisation" of ion-implanted diamond
R.A. Spits, J.F. Prins and T.E. Derry 347
Detection of submonolayer ^{18}O on a gold surface by nuclear reaction analysis
L.S. Wielunski and L. Wieczorek 352

Section 6. SIMS, SNMS, etc.

Practical aspects of ion beam analysis of semiconductor structures
L. Frey, P. Pichler, I. Kasko, I. Thies, S. Lipp, N. Streckfuss, L. Gong and H. Ryssel 356
SIMS and depth profiling of semiconductor structures
B.G. Svensson, M.K. Linnarsson, B. Mohadjeri, M. Petravić and J.S. Williams 363
A SIMS study of the altered layer in Si using $^{18}O_2$ primaries at various angles of incidence
G.P. Beyer, S.B. Patel and J.A. Kilner 370
Angular dependence of ion yields and cesium surface coverage in Cs^+ attachment secondary ion mass spectrometry (CsAMS)
K. Wittmaack 374
Depth resolution in SIMS study of boron δ-doping in epitaxial silicon
J.C. Dupuy, G. Prudon, C. Dubois, P. Warren and D. Dutartre 379
Low energy ion mixing in Si–Ge multilayer system
M. Menyhard, A. Barna, A. Sulyok, K. Järrendahl, J.-E. Sundgren and J.P. Biersack 383
Depth resolution during sputter profiling of Si in GaAs
M. Petravić 388
A method of improving the SIMS analysis of Si in GaAs by monitoring SiO_2^- ions at oblique angles of bombardment
V.K.M. Sharma, D.S. McPhail, C.M. Hsu and M.R. Fahy 391

Influence of layer thickness and primary ion on profile broadening during sputtering of $Al_{0.5}Ga_{0.5}As/GaAs$ structures
M.K. Linnarsson, B.G. Svensson, Z.F. Paska and J. Borglind 395
A SIMS study on the secondary ion yield in boron implanted silicon using a low energy primary oxygen beam
M. Tomita, F. Takahashi and Y. Homma 399

Section 7. Low and medium energy scattering

Application of real-time low-energy ion scattering spectroscopy to heterointerface formation processes of molecular beam epitaxially grown III–V compound semiconductors
M. Tamura, T. Saitoh, N. Sugiyama, A. Hashimoto, S. Ohkouchi, N. Ikoma and Y. Morishita . . 404
The structure of the Si(100)-(4 × 3)In surface studied by STM and ICISS
B.E. Steele, D.M. Cornelison, L. Li and I.S.T. Tsong 414
Mechanism of neutralization in low-energy He^+ ion scattering from carbidic and graphitic carbon species on rhenium
L.C.A. van den Oetelaar, S.N. Mikhailov and H.H. Brongersma 420
Surface composition of $Pt_{10}Ni_{90}(110)$
P. Weigand, B. Jelinek, W. Hofer and P. Varga 424
Impact-collision ion-scattering spectrometry studies of the $VC_{0.8}(111)$-(8 × 1) surface
M. Hammar, B.E. Steele and I.S.T. Tsong 429
Composition and structure of the $Cu_{85}Pd_{15}(110)$ (2 × 1) surface: a low energy ion scattering investigation
R.H. Bergmans, M. van de Grift, A.W. Denier van der Gon, R.G. van Welzenis, H.H. Brongersma, S.M. Francis and M. Bowker 435
Low energy ion scattering study of hydrogen-induced reordering of Pb monolayer films on Si(111) surfaces
K. Oura, Y. Tanaka, H. Morishita, F. Shoji and I. Katayama 439
Azimuth-energy anisotropy of Ar ions scattered from a Ni(111) surface
S. Tzanev, I. Neshev and D. Karpuzov 443

Section 8. Lattice sites and structure

Channeling analysis of the oxygen sublattices in oxide single crystals
A. Turos, O. Meyer, L. Nowicki, J. Remmel and M. Wielunski 448
The lattice site of Au in Be after 24 h ^{197m}Hg isotope implantation and decay
E. Alves, J.G. Correia, J.G. Marques, A.A. Melo, M.F. da Silva, J.C. Soares and H. Haas 457
Combination of IBA techniques and Raman spectroscopy to study defects in ^{18}O labelled YBaCuO thin films
J. García López, J.C. Cheang Wong, C. Ortega, J. Siejka, I. Trimaille, A. Sacuto, G. Linker and O. Meyer 462
Lattice sites of ion implanted Li in indium antimonide
H. Hofsäss, U. Wahl, M. Restle, C. Ronning and E. Recknagel 468
Lattice site location of iron in potassium niobate
O. Beck, D. Kollewe, A. Kling, W. Heiland and F. Hesse 474
Radiation damage and trapping of helium in HOPG-graphite
G. Ramos and B.M.U. Scherzer 479
Lattice location of Cr in GaAs determined from Monte Carlo simulation of ion channeling spectra
Y. Kido, T. Ishida, E. Nakai, M. Saeki, J. Nakata and K. Takahei 484
Dependence of the $^7Li(p, \alpha)^4He$ minimum yield on the Mg-concentration for proton channeling in $LiNbO_3$: Mg
A. Kling, D. Kollewe and B.C. Grabmaier 490

The use of PIXE/channeling for the localization of zinc in InP
H. Krause, R. Flagmeyer, J. Vogt and K. Pinkert 494
Reconstruction of Ar depth profiles from PIXE measurements
T. Osipowicz, S.C. Liew, K.K. Loh, I. Orlic, S.M. Tang and Th. Weber 499
Lattice location of implants in diamond by conversion electron emission channeling
E.J. Storbeck, S.H. Connell, J.P.F. Sellschop and H. Hofsäss 503
Perturbed angular distribution studies in natural, synthetic CVD and HPHT diamond
S.H. Connell, E. Sideras-Haddad, K. Bharuth-Ram, C.G. Smallman, J.P.F. Sellschop and M.G. Bossenger 508
Study of damage accumulation in sapphire during nitrogen implantation
C. Soumoy, F. Bodart and J. Chevallier 516
Investigation of radiation damage in garnets produced by implantation of rare earth ions and its annealing
A. Steinecke and D. Kollewe 520
Comparative investigation of damage induced by diatomic and monoatomic ion implantation in silicon
T. Lohner, Z. Tóth, M. Fried, N.Q. Khánh, G.Q. Yang, Lin Chen Lu, S. Zou, L.J. Hanekamp, A. van Silfhout and J. Gyulai 524
Defect investigation in boron implanted silicon by means of temperature dependent RBS and optical near-edge absorption
E. Wendler, K. Gärtner, W. Wesch, U. Zammit and K.N. Madhusoodanan 528
Temperature dependent dechanneling of 1.4 MeV He^+ and optical near-edge absorption in B^+ implanted GaP
W. Wesch, E. Wendler, J. Kaczanowski and A. Turos 533
Simultaneous application of (p, γ) and (p, α) channeling to the detection of light elements in crystals
E.K. Williams, D. Ila and R.L. Zimmerman 537

Section 9. Theory of IBA

Light-ion stopping near the maximum
P. Sigmund 541
Stopping powers for channeled helium ions in silicon using electron densities from bandstructure calculations
P.W.L. van Dijk, L.J. van IJzendoorn, M. de Koning, P. Bobbert, W. van Haeringen and M.J.A. de Voigt 551
Non-Gaussian energy loss distribution of light ions in thin films
N. Matsunami and K. Kitoh 556
Trapping and reflection coefficients for deuterium in graphite at low energy and oblique incidence
M. Mayer, B.M.U. Scherzer and W. Eckstein 560
Energy and medium dependence of the Lewis effect in high resolution excitation curves near narrow nuclear resonances
I.C. Vickridge and G. Amsel 566
Multiple scattering induced resolution limits in grazing incidence resonance depth profiling
G. Battistig, G. Amsel, E. d'Artemare and A. L'Hoir 572
Range parameters of Er, Ga and F implanted into SiC films
P.F.P. Fichtner, M.C. Herberts, P.L. Grande and M. Behar 579
Scattering of heavy ions in crystals
V.A. Muralev 584

Section 10. Data collection, evaluation and simulation

Computer methods for analysis and simulation of RBS and ERDA spectra
E. Kótai 588
IMAP: a complete Ion Micro-Analysis Package for the nuclear microprobe
A.J. Antolak, G.S. Bench and D.H. Morse 597
On the nonlinearity of silicon detectors and the energy calibration in RBS
W. Hösler and R. Darji 602
Evaluation of atomic displacement in ion implanted GaAs
J. Kaczanowski, A. Turos, K. Gärtner, T. Bachman and W. Wesch 607
PIXE data evaluation in Prague
V. Potoček and Z. Nejedlý 611
Theoretical calculation of the depth resolution of IBA methods
E. Szilágyi and F. Pászti 616
Application of an iterative maximum-likelihood algorithm in PIXE depth profiling of trace elements
S.C. Liew, K.K. Loh and S.M. Tang 621
Bi-implanted silicon reference material revisited: uniformity of the remaining batch
U. Wätjen and H. Bax 627
Resonant nuclear reaction analysis with high depth resolution
A.I. Kul'ment'ev, V.E. Storizhko and O.I. Zabashta 633
PIXE-INP computer code for PIXE analyses of thin and thick samples
V. Havránek, V. Hnatowicz, J. Kvítek and I. Obrusník 637

Section 11. Detection methods

Energy resolution of silicon detectors: approaching the physical limit
E. Steinbauer, P. Bauer, M. Geretschläger, G. Bortels, J.P. Biersack and P. Burger 642
Elastic recoil detection analysis using ion-induced electron emission for particle identification
O. Benka, A. Brandstötter and E. Steinbauer 650
High-resolution elastic recoil depth profiling using alpha-particle beams: CERDA-TOF
S.S. Klein, H.A. Rijken, P.W.L. van Dijk and M.J.A. de Voigt 655
Elastic recoil selection by pulse shape analysis
S.S. Klein, H.A. Rijken, H.P.T. Tolsma and M.J.A. de Voigt 660

Section 12. Accelerators, beam handling, microbeam

Nuclear microprobe development and application to microelectronics
M. Takai 664
Focused MeV light ion beams for high resolution channeling contrast imaging
D.N. Jamieson, M.B.H. Breese and A. Saint 676
Three-dimensional analysis of locally deposited silicon oxide on ferrite by a combination of microprobe RBS and PIXE
A. Kinomura, Y. Horino, Y. Mokuno, A. Chayahara, M. Kiuchi, K. Fujii, M. Takai and Y.-F. Lu 689
A data acquisition system for scanning microbeam analysis
D.H. Morse 693
Three dimensional RBS on the Faure nuclear microprobe
C.L. Churms and R. Pretorius 699
Charge collection and soft error in DRAMs investigated using 400 keV proton microprobe
H. Sayama, H. Kimura, Y. Ohno, K. Sonoda, N. Kotani, S. Satoh and M. Takai 703

The National University of Singapore nuclear microscope facility
F. Watt, I. Orlic, K.K. Loh, C.H. Sow, P. Thong, S.C. Liew, T. Osipowicz, T.F. Choo and S.M. Tang 708

Beam parameters and characterization technique
I. Krafcsik, L. Farkas, A. Zimmer, C. Rossi, A. Fabris, G. Gorini and R. Poggiani 716

Investigation of a duopigatron ion source for He^{2+} ion production
Y. Agawa, S. Seki, H. Yamakawa and M. Takai 722

Setup for materials analysis with heavy ion beams at the Munich MP tandem
W. Assmann, P. Hartung, H. Huber, P. Staat, H. Steffens and Ch. Steinhausen 726

Use of STIM in the proton microprobe analysis of single particles
I. Bogdanović, S. Fazinić, M. Jakšić, G.W. Grime and V. Valković 732

Deceleration of MeV antiprotons and muons to keV energies – the anticyclotron. A progress report
D. Horváth, E.C. Aschenauer, D. Cauz, D. Chatellard, P. DeCecco, J. Eades, J.-P. Egger, K. Elsener, P. Eugster, F. Formisano, G. Gorini, P. Hauser, F. Kottmann, I. Krafcsik, V. Lagomarsino, G. Manuzio, J. Missimer, R. Poggiani, L.M. Simons, G. Testera, G. Torelli and F. Waldner 736

MeV heavy ion microprobe PIXE for the analysis of the materials surface
Y. Mokuno, Y. Horino, A. Kinomura, A. Chayahara, M. Kiuchi, K. Fujii and M. Takai 741

External beam RBS in an unenclosed helium environment
L. Giuntini and P.A. Mandò 744

A 0.9 MV accelerator for materials research at the STU Bratislava
P. Kováč, M. Pavlovič and J. Dobrovodský 749

Channeling contrast analysis of GaAs side-walls fabricated by laser wet chemical etching
M. Takai, S. Hara, C. Lee, A. Kinomura and T. Lohner 752

Development of a 200 kV FIB system for non destructive three-dimensional near surface analysis
R. Mimura, H. Sawaragi, R. Aihara and M. Takai 756

Ion beam equipment modification for external beam operation
J. Král and J. Voltr 760

Computer simulation to calculate current distributions and emittance patterns of ion beams for synthesis of electric lenses
L. Kiss, I. Krafcsik and L. Farkas 764

Section 13. New methodical developments

Accelerator SIMS for trace element detection
M. Döbeli, P.W. Nebiker, M. Suter, H.A. Synal and D. Vetterli 770

Ion beam induced luminescence from diamond and other crystals from a nuclear microbeam
A.A. Bettiol, D.N. Jamieson, S. Prawer and M.G. Allen 775

^{7}Li-induced reactions for light elements analysis
J.R. Liu, Z.S. Zheng, N. Yu and W.K. Chu 780

Depth microscopy at interfaces
G. Dollinger, T. Faestermann, C.M. Frey, A. Bergmaier, E. Schwabedissen, Th. Fischer and R. Schwarz 786

A comparison between MeV protons and α particles for IBIC analysis
M.B.H. Breese, C.H. Sow, D.N. Jamieson and F. Watt 790

Continuum optical radiation produced by Ar^{+} and Kr^{+} bombardment of semiconductor and metal targets
R. Kuduk, J. Żuk and D. Mączka 794

Application of radioactive ion beams in the study of implanted layers
A. Latuszyński and D. Mączka 798

ERD technique with monochromatic neutrons as an effective tool for hydrogen-material systems study
B.G. Skorodumov, I.O. Yatsevich, V.G. Ulanov, E.V. Zhukovska and O.A. Zhukovsky 803
Microcharacterizing zircon mineral grain by ionoluminescence combined with PIXE
C. Yang, N.P.-O. Homman, L. Johansson and K.G. Malmqvist 808

Section 14. Other applications of IBA

Advantages and limitations of external beams in applications to arts & archeology, geology and environmental problems
P.A. Mandò 815
PIXE analysis of byzantine ceramics
S.Y. Waksman, A. Pape and Ch. Heitz 824
Characterization of the air pollution in the urban area of Madrid
A. Climent-Font, E. Swietlicki and A. Revuelta 830
The PIXE–PIGE method for the classification of late Roman glass sealings
I. Borbély-Kiss, Zs. Fülöp, T. Gesztelyi, Á.Z. Kiss, E. Koltay and Gy. Szabó 836
Nuclear microscopy of single aerosol particles
I. Orlic, F. Watt, K.K. Loh and S.M. Tang 840
Ion induced X-ray emission and electron microscopy for the investigation of micro-particles
C.M. Romo-Kröger 845
PIXE analysis of cascade impactor samples collected at the Kruger National Park, South Africa
I. Salma, W. Maenhaut, J. Cafmeyer, H.J. Annegarn and M.O. Andreae 849
Roman influences on metalworking at the Titelberg (Luxembourg): Compositional studies using PIXE spectrometry
E. Hamilton, C.P. Swann and S.J. Fleming. 856
RBS and Raman spectroscopy study of heat-treatment effect on phenolformaldehyde resin
A.L. Evelyn, D. Ila and G.M. Jenkins 861
Roman onyx glass: A study of production recipes and colorants, using PIXE spectrometry
S.J. Fleming and C.P. Swann 864
External-beam PIXE analysis of ancient chinese coins
E.K. Lin, C.T. Shen, Y.C. Yu, C.W. Wang, C.H. Hsieh and S.C. Wu 869
Characterization of organic matter/minerals associations in oilfield rocks using the nuclear microprobe
F. Mercier, N. Toulhoat, P. Trocellier and C. Durand 874
Elemental and isotopic distributions of boron and lithium in tourmalines using nuclear microprobe
V. Michaud, N. Toulhoat, P. Trocellier and P. Courel 881
Analysis of diatomite sediments from a paleolake in central Mexico using PIXE, X-ray tomography and X-ray diffraction
J. Miranda, A. Oliver, G. Vilaclara, R. Rico-Montiel, V.M. Macías, J.L. Ruvalcaba and M.A. Zenteno. 886
PIXE analysis of Bronze and Iron Age weapons from Bactria
H. Mommsen, Th. Beier, M.L. Garg, D. Heimermann, F. Hennrich, H. Ihmsen and H.-G. Hüttel 890
Micro-analysis of kidney stones sequentially excreted from a single patient
C.A. Pineda and M. Peisach 896
PIXE analysis of pottery from the northern Cape Province of South Africa
L. Jacobson, C.A. Pineda, D. Morris and M. Peisach 901
RBS, AES, EDX and ESCA investigation of heat treatment effects on stainless steel alloy 440C
T. Taylor, D. Ila and J.C. Cochrane 904

Section 15. IBA in semiconductors

Mass and energy dispersive recoil spectrometry of Si_xGe_{1-x} grown by electron beam evaporation
P.N. Johnston, S.R. Walker, I.F. Bubb, D.D. Cohen, N. Dytlewski, M. Hult, H.J. Whitlow, C. Zaring, M. Östling and M. Andersson 907

Ion beam mixing and oxidation of a Si/Ge-multilayer under oxygen bombardment
W. De Coster, B. Brijs, P. Osiceanu, J. Alay, M. Caymax and W. Vandervorst 911

RBS and recoil spectrometry analysis of $CoSi_2$ formation on GaAs
M. Hult, H.J. Whitlow, M. Östling, N. Lundberg, C. Zaring, D.D. Cohen, N. Dytlewski, P.N. Johnston and S.R. Walker 916

Observation of local SIMOX layers by microprobe RBS
A. Kinomura, Y. Horino, Y. Mokuno, A. Chayahara, M. Kiuchi, K. Fujii, M. Takai, T. Lohner, H. Ryssel and R. Schork 921

Investigation of the effect of altered defect structure produced by photon assisted implantation on the diffusion of As in silicon during thermal annealing
L.P. Biró, J. Gyulai, S. Bogen, L. Frey and H. Ryssel 925

Studies of MOCVD grown HgCdMnTe by ion beam and related techniques
W.B. Studd, P.N. Johnston, I.F. Bubb and P.W. Leech 929

Implanted damage evolution in sequential annealed silicon
O. Buiu, M. Gartner, R. Plugaru and M. Dumitru 933

Production and analysis of buried nitride layers in Si/SiO_2 with ion beam methods
D. Fröse and D. Kollewe 936

RBS studies of nickel behavior in silicon, amorphized with nickel ions
A.Yu. Kuznetsov, V.N. Mordkovich and A.F. Vyatkin 940

Author index 943
